

edifecs

**Edifecs** is a premier health information technology company with solutions focused on interoperability, workflows, value-based payments and analytics. With innovative technology and SaaS-based solutions, Edifecs optimizes the secure exchange and processing of administrative and clinical data, supporting regulatory compliance such as Fast Healthcare Interoperability Rules (FHIR), and automating workflows within healthcare operations.

For 25 years, Edifecs has partnered with leading managed care plans (across all states and lines of business) and other healthcare entities (such as PBMs) to establish itself as the market leader in trading partner management, enrollment management and encounter submission and risk adjustment analytics. Over 350 healthcare organizations use Edifecs solutions, serving more than 215 million lives with 1.4B encounters submitted annually.

Edifecs is headquartered in Bellevue, Washington, with additional offices in Atlanta, Georgia and Mohali, India, an engineering center in Moldova, and has more than 600 employees.
