

Social Responsibility is What We Do!

UnitedHealthcare Community Plan of Florida is passionately focused on the value and impact of volunteerism and social responsibility. Not only does it create a positive impact on our community, but we recognize how it improves the lives of our employees and their families.

Over the past few months, UHC employees have been involved in over twenty volunteer projects throughout Florida including Special Olympics, Dream Center of Tampa, Parkinson's Foundation Walks, and NAMI events, just to name a few. Below are a few highlights.

Dream Center of Tampa:

UHG volunteers came out to support the Dream Center of Tampa on Saturday, April 27th as they raised money to make life-changing impacts for children in the Tampa Bay area.

The Dream Center partners with schools, parents, and other organizations throughout the Tampa Bay community to provide engaging, educational programs that are free resources for students and families.

To date, The Dream Center has impacted well over 1200 kids and teen by helping them recognize their full potential and how they opportunities they have today can positively affect their future.

The Dream Center of Tampa has been building relationships with Ybor students throughout educational and outreach programs since 2010.

UnitedHealthcare Community Plan assisted in organizing volunteers to participate in this annual event and provided support with giveaways for attendees.

NAMI Walk Miami-Dade:

With a turnout of more than 3,500 attendees, 265 teams and a fundraising effort that surpassed their goal, this year's Walk was Miami's largest Walk to date.

UnitedHealthcare showed support by organizing a team of walkers and fundraisers who handed out Sesame Street books focused on mental health and resiliency to attendees.

We are Here for What Matters and will continue to support our amazing community organizations for years to come.
