

Simply Healthcare Hosts Maternal Health Fair at its Community Resource Center in Hialeah

Simply Healthcare Plans, in partnership with March of Dimes, hosted a Mom and Baby Health Fair on March 14 at its Community Resource Center in Hialeah, creating a welcoming space for expectant mothers to access education, resources, and support.

The event is part of a broader collaboration following Simply Healthcare's \$100,000 contribution to March of Dimes, supporting efforts to improve maternal and infant health outcomes. Attendees received essential supplies and connected with community partners offering resources such as infant dental care kits and guidance on monitoring blood pressure during pregnancy.

Events like this highlight Simply Healthcare's commitment to using its Community Resource Center as accessible, trusted space where members can find meaningful support and practical health education.

By working alongside community partners, Simply Healthcare continues to strengthen local support systems and expand access to resources that help mothers and babies thrive across Florida.
