

At UnitedHealth Group, our team members often contribute their time and resources to helping improve the health of the communities where we work and live. Through partnerships with local organizations and community leaders, employees support initiatives that expand access to care, address social needs, and promote healthier outcomes for individuals and families. These efforts reflect our shared commitment to service, collaboration, and making a meaningful difference beyond the workplace.

## Why I volunteer?

*I volunteer because I love to give back to the community and help others. I am very fortunate, and I don't take that for granted. My family has a little Mom and pop Grocery in the Community, and we have helped so many and continue to do so.*

*So, when the company I work for chooses to help others I am always going to try and be there. Everyone just needs someone to believe in them.*

*I love UHC for what we do in the community and keep up the great work.*

*Keith Jackson*
